Using your new HomeControl+ APP

Ever wanted to check the status of your home security system, or needed to let someone into your home whilst you are away?

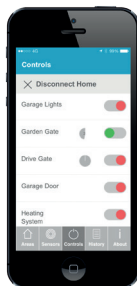

Use the 'Areas' screen to show the status of your areas in your house and enable you to unset and set areas from anywhere in the world.

Want visibility and control over one or more security systems?

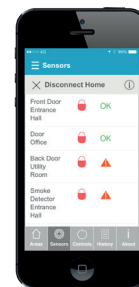

Use the 'My Security Systems' screen to manage your systems, be it at home, work, or your holiday home.

Would you like to control various appliances through your home system right from the HomeControl+ app?

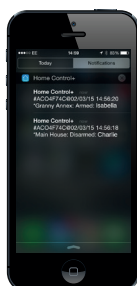

The 'Controls' screen gives you the ability to turn on and off appliances right from your smart phone, quickly and simply.

Do you want to know when and which sensors on your system have reported a fault or have gone into alarm when you're not there?

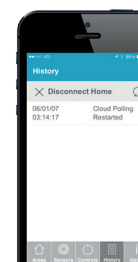

Use the 'Sensors' screen to give you unparalleled visibility into your system including the individual sensors on your system.

Want to know when your kids arrive home from school or if your batteries need replacing?

The push notifications feature can be tailored to your needs being sent directly to your smart phone, taking the worry out of your day.

Want to know what's been going on with your home security system?

Download the History logs for the system right to your HomeControl+ app.

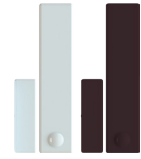

Your HomeControl+ system sensors

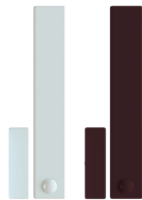

Smoke and Carbon Monoxide sensors link directly with your home system, giving you and your family added protection.

Six different types of motion detector, so whether you have a pet, garage, conservatory or long corridor to protect, we have a specific detector optimised for the application.

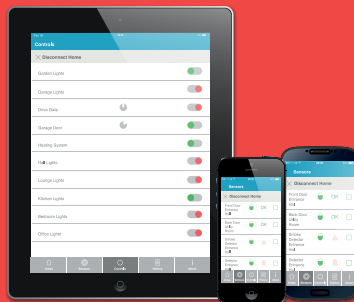

Small and compact door and window contacts in both white and brown to complement your interior design.

Combined shock and magnetic contacts giving you two sensors in one, perfect as a confirmed alarm signal for systems connected to an alarm receiving centre or for police response.

Water leak sensors connected directly to your system can give you advance warning of flooding or leaking appliances, providing you with the prior knowledge to take action.

A range of two-way wireless devices to protect you and your family

Remote access of your home via your smartphone or tablet from anywhere in the world

Completely wireless system giving you a hassle free installation without lifting carpets, floorboards, or running wires
